

5 WHAT IS CLAIMED IS:

1. A liquid laundry detergent composition contained within the water-soluble body for release upon the dissolution of the water-soluble body, the composition comprising:
- 10 -- at least two layers, said at least two layers comprising in total:
- i. from about 5 to about 90% of a detergent surfactant; by weight of the composition;
  - ii. from about 5 to about 50% of a colored inorganic electrolyte, by weight of the composition; and
  - 15 iii. from about 1 to about 85% of water, by weight of the composition.
2. The composition of claim 1, wherein the composition further comprises a hydrotrope.
- 20 3. The composition of claim 1, wherein the composition further comprises a dye.
4. The composition of claim 1, wherein the detergent surfactant in the composition comprises a mixture of an anionic and a nonionic surfactant.
- 25 5. The composition of claim 4, wherein the ratio of the anionic surfactant to the nonionic surfactant is from about 10:1 to about 1:10.
6. The composition of claim 1, wherein the volume ratio of the first layer to the
- 30 second layer is from about 10:90 to about 90:10.
7. The composition of claim 1, wherein the composition is packaged within a transparent container.

- 5      8.      The composition of claim 1, wherein the composition is transparent.
9.      The composition of claim 1, further comprising a third layer.
- 10      10.      The composition of claim 1, wherein the third layer is a layer of capsules or  
emulsion.
11.      A liquid laundry detergent composition comprising:  
          -- at least two layers, said at least two layers comprising in total:  
          i.      from about 5 to about 90% of a detergent surfactant; by  
15               weight of the composition;  
          ii.     from about 1 to about 50% of total electrolyte, by weight  
               of the composition, the electrolyte comprising a colored  
               inorganic electrolyte and another electrolyte selected from  
20               the group consisting of an additional inorganic electrolyte,  
               organic electrolyte, and mixtures thereof, and  
          iii.    from about 1 to about 70% of water, by weight of the  
               composition.
12.      The composition of claim 11, wherein the composition further comprises a  
25      hydrotrope.
13.      The composition of claim 11, wherein the composition is transparent.
14.      The composition of claim 11, wherein the composition is packaged within a  
30      transparent container.
15.      The composition of claim 11, wherein the electrolyte comprises from about 0.001  
to about 10% of the colored inorganic electrolyte.
